

Sneak Peek

One who thinks just for a year, takes crops of Jwar, Bajra and Cotton. One who thinks for a few years, plants fruits. But one who thinks generations ahead, sows the seeds of education.

-Dr. Bhavarlal H. Jain

IN THE MEMORY OF DADAJI

A seven-day offering of different art forms such as Music, Painting, Tabla playing and Sketching held in Bhaunche Udyan marked the Punya Tithi of Dadaji. He was fondly remembered on this occasion not only by Anubhuthians but also by the citizens of Jalgaon. We also got the chance to perform our art on the 24th of February. A number of students were blessed with the opportunity to showcase their talents in front of the public.

The anchor of the program was Anjali didi of Class 11. After she read out the introductory speech, we presented a melodious prayer sung by our school lead group and Nikhil sir. Subsequently, two letters were read out by the students, which had been written to Dadaji. His inspirational replies were also read out. This was followed by a tabla recital by Amritesh sir along with his large group of tabla students. Nikhil sir, accompanied by the lead group, sang three more melodious songs. The programme ended with Dadaji's favorite song 'Tera mangal, mera mangal, sabka mangal hoe re'.

The students gave their performance from the bottom of their hearts, and we hope that the audience found the program mesmerizing. The schedule of this seven-day program was as follows: On the first day, a skit was performed. On the second and third day, an exhibition of different types of arts was held. On the fourth day, a flute recital was held along with a live painting and pottery session. The audience was enthralled by these various performances, especially the tabla recital; the beats played with full energy were spellbinding. Tabla students played some compositions along with some paltas. In the end, Amritesh sir demonstrated a conversation between Lord Krishna and Radha, which was carried out with the help of just Tabla, which received a long round of applause.

It became a memorable event for all of us. We all felt as if we spent some time with our Dadaji even though he was not present physically amidst us.

- Mahak Chajjer, Class 6

INTO THE WORLD OF SCIENCES

Continuing with the tradition, Anubhuti School hosted the Science and Math Fest 2017-18 on its campus from the 19th of February to the 22nd of February. On the first day, the Faculty of Science, Math & Computer Science made presentations on the concepts of basic mathematics and its applications. The audience found it highly enlightening. A quiz programme based on sciences, math and computers was also held involving class 5, 6, 7, 8, 9 and 11. All students participated with a great deal of enthusiasm.

On the second day, the students of 8th grade presented skits using the principles of science, math and computers. The skits were very entertaining as well as educative. After the skits, the students of class 9 and 11 organized a debate on the topic: Relevance of Science and Society. The class 8 students also took part in the debate with an overwhelming enthusiasm.

The main event of Science & Math was held on the 22nd of February. The programme was mainly an interschool competition with models displayed on a host of scientific themes. Dr. Pradeep Joshi was the Chief Guest on the occasion. Dr. Joshi delivered the keynote address on Human Mind and Scientific Temperament. His talk was very informative, and it generated a very meaningful interaction between Dr. Joshi and the students as well as the staff.

On this occasion our school invited a very young student innovator, Usman Patel, from Tapti Public School, Bhusaval, as Guest of Honor. Usman has received national awards for his innovations from the president of India two times and many other awards at state level. Usman explained his innovations in detail through a PowerPoint presentation. The session was very interesting to all and inspired all the students. Later on, Usman had a long chat with the students.

Our school Director, Mrs. Nisha Jain, felicitated Usman by

presenting him with a trophy and congratulated him on his outstanding achievements.

After the Guest of Honour programme, the Model competition started in which Anubhuti English Medium School, Kashinath Palod Public School, Orion English Medium Secondary School, Podar International School Jalgaon, Tapti Public School Bhusaval, Ujjwal Sprouter International School and Vivekanand Pratishthan English Medium School,

Jalgaon participated.

The jury comprised Dr. Gorey from North Maharashtra University and Dr. Akhilesh Mishra from Jain Irrigation Systems Ltd. They evaluated every model with critical examination and also interacted with the school teams.

After the evaluation, the Jury declared Anubhuti English Medium School as runner-up and Kashinath Palod Public School as winner.

Podar School won the consolation prize for their innovative special concept.

Besides model presentations by outside schools, the students of Anubhuti presented 66 small scientific and math models made by our students. The science models were liked by all visitors and schools and they had good interactions. Every team explained their model in detail with good enthusiasm and the visitors appreciated the models.

Nisha Madam and Principal J.P. Rao Sir felicitated the winners and participants with trophies and certificates. The programme concluded with a vote of thanks proposed by our senior Physics teacher, Yogesh Patil sir.

The whole program was made possible by the valuable support and guidance from the Director, Principal and the Science Faculty of the school.

– U.V Rao, Teacher

A VISIT TO LOCAL PARLE-G MANUFACTURING UNIT

The Class IX Commerce and class XI Business Studies Students visited Parle-G factory in Jalgaon on the 18th of January. The factory manager, Mr. Mulley, explained the production process and also the different aspects of marketing and branding. The students went inside the packaging and batch processing unit, where they understood how packaging and labelling are essential for Parle-G. Finally, Mr. Mulley explained why Parle-G is the

highest selling biscuit brand in the country today beating their rivals Britannia and ITC Sunfeast. It was a great experience for us all to visit the industrial unit of a global brand like Parle-G. We are thankful to our Commerce Teacher, Swagat Sir and English Teacher, Abhinav Sir for arranging this visit.

- Vansham Gupchandani, Class 9

A WEDDING RECEPTION WITH A DIFFERENCE

On the 18th of February, all Anubhutians including staff and students were cordially invited by our director, Mrs. Nisha Jain, to attend the wedding reception of her and Anil Bhau's son, AthangBhaiya. What we looked forward to and thought of as an opulent grand social event turned out to be an enchanting evening of fun, entertainment and recreation galore, not to mention a huge number of delicacies served at dozens of counters for us to savour, relish and remember forever. The gala function was attended by all the students from class 5 to 12. In the sylvan surroundings of the scenic and serene Shradha Dham (Dadaji's Samadhi) at Jain Hills, we were welcomed in a retro traditional style. We started off by remembering Dadaji and bowing to his Samadhi. Soon we took a plunge into revelry in an atmosphere of a festive carnival, which was exclusively organized for Anubhutians. It was a refreshing evening especially for the 9th and 11th graders as they had just finished their final examinations. Getting a well-deserved respite from the monotony of a long spell of study schedule made everyone enjoy to the fullest. The venue was a perfect setting for a memorable MELA (funfair). We had many games, food items and a fanciful elevated scooter to be photographed with! We all knew

that we were going to enjoy ourselves to our heart's content. Some of us started our game playing spree with the Net Cricket which was the hot spot for everyone. We also had basketball and the ring game where most of us won some or the other prizes. There was also a Jain Art gallery set up which was also a great attraction for many. It had a statue of Dadaji where we clicked many photos including a few with the grand backdrops like those of palaces. Feeling fully satiated, we proceeded to the food stalls—the strawberry ice cream, cookie with ice cream, the local cuisine like Besan Bhakri. We also got to savour the traditional varieties such as Pav Bhaji, Dosa, Mexican Pani-Puri, etc. The fanciful toy-like scooter painted in yellow with a background of bright bluish sky all around it witnessed a long line of children and adults waiting to be photographed like truly riding it. All good things must come to an end—as the saying goes—this enchanting evening also ended on a bright note when the Anubhutians presented the newlyweds with a bouquet and wished them a happy conjugal life! They both looked so gorgeous and gracefully obliged everyone who requested a snap with them.

- Tejas Bhurat and Vedant S. Agrawal, Class 11

A WONDERFUL TREKKING EXPERIENCE

It was a bright Sunday morning on the 18th of February. The sun glared low between the trees, dazzling our eyes. We were all ready to set out on a trek up the mountain premises. We were all over it. We started our required equipment and materials such as ropes, water, juice, and some kitchen items for cooking food. After a two-hour walk through the forest and mountains while admiring natural beauty and suitable place to pitch our tents. We collected some raw bananas, we found a collected all the raw materials such as and made a temporary chulha. While fields and collected quite a few; we made they came out so well and tasted the bosom of Mother Earth for some time prepared aloo-sabzee, khichadi, and the and had a siesta lying on the bare ground started unhitching our tents and pack up left, we offered it to a couple of farmers delicious bananas. While returning we flowers such as roses, marigolds, etc. We helped ourselves to the delicious returning we took a different route, climbing school, which at first seemed a Herculean task. We got so tired that on reaching the school we slept for an hour to regain our energy for the rest of the day. The trek was truly enjoyable and memorable.

We got so tired that on reaching the school we slept for an hour to regain our energy for the rest of the day. The trek was truly enjoyable and memorable.

Parth Patidar, Class 9

A DAY AWAY FROM BOOKS

On the 7th of January 2018, class 10 students made a day-trip to Shegaon. The prospect of getting away from the hectic school schedule and the world of books, studies and exams thrilled us. Quite early in the morning we started from the school with our escorts, Abhinav sir, Mani sir, Nalini akka, and Neerja akka. The time flew fast as we sang, danced and enjoyed ourselves throughout the bus journey. We reached Shegaon around 11 am and went straight to the holy worship site: Gajanan Maharaj Mandir. After an hour-long waiting in the queue, we had our turn to have Darshans and received blessings from the presiding deity of the temple for the success in our exams. From there we headed towards Anand Sagar for fun and recreation. After a quick journey of 5 km we reached Anand Sagar and dashed straight into the restaurant named Anand Sagar. Finishing our lunch we proceeded towards the amusement park where we did some rides, hanged around and enjoyed ourselves to the fullest. On our return journey we went to the Parle-G factory that is owned by one of our classmates. After a three-month restriction on biscuits, we were excited to eat fresh hot Parle-G biscuits to our heart's content. We felt the blues in our hearts returning to the same old world of books and exams. However, a day full of amusement and fun had helped us recharge our batteries, and we were once again ready to work with all our determination and focus.

- Awadesh Chandak, Class 10

ANUBHUTI TEAM AT BALAGHAT SCIENCE & TECHNOLOGY EXHIBITION!

Under his guidance and accompanied by our Biology teacher, Parmar Sir, we started from school for Balaghat on the 15th of February. Piyush and I had worked hard preparing for the project. We first went to Takarkheda to gather some useful information relevant to the exhibition that we were going to participate in. It took us about 15 hours to reach Balaghat. On the way, we were thrilled to spot a fox and a hyena. On reaching Balaghat, we checked in at a hotel and, after taking a little rest and bath, we got ready for the exhibition. The exhibition was a science fair organized by the Madhya Pradesh Council of Science & Technology. Our stall was always green and wet. This was because we sprinkled water on the plants at the regular interval of an hour or so. Every evening the organizers showed us stars and their constellations through telescope. There was also a planetarium called 'Tara Mandal'. It was organized by Mr. Rajan Singh, who is responsible for taking this exhibition across India to teach students. We also met Ranade Sir, a senior scientist at Vigyan Prasara. In all, we entertained 12 to 15 thousand visitors at our stall. Our stall was based on future farming

practices. We explained our project named 'Aeroponics, Hydroponics, Growing of hydroponic fodder, Vertical farming and Wall Gardens' to school students, college students, scientists, educators and the common public. While in Balaghat, we also enjoyed attending a funfair. Nilesh Dada, Sunil Dada, Piyush and I enjoyed the rides. We also visited Lonar Lake on our way back. We collected water sample to observe microorganisms of Lonar Lake. We collected various rocks there and also took a few bottles of water samples to observe microorganisms of Lonar Lake. By the time we left there, we were completely exhausted. We felt we were returning to school after ages. We reached the school campus on the 21st of February early in the morning. Our experience was highly informative and interesting. I would like to thank Parmar Sir, J. P. Rao Sir and Nisha Akka for giving us such a wonderful opportunity. I would also like to thank Nilesh Dada and Sunil Dada for making our participation in this exhibition so memorable.

– Aryan Modi, Class 8

AN ISRO SCIENTIST VISITS ANUBHUTI

Mr. Sanjay Gulabchand Jain talked to students at a special assembly on the 12th of February. He is the deputy head, Quality Assurance division for all liquid propulsion stages and preflight preparation activities at the Satish Dhawan Space Centre, Sriharikota. To date, Mr. Jain has contributed to the successful launch of 44 vehicles of ISRO, which includes Chandrayan-1, Mangalyan and the record-breaking PSLV mission with 104 satellites and many more. Mr. Jain interacted with the students and told us about the rocket

launchers and the manufacturing, launching and all the process involved in this. Mr. Jain also encouraged the students to learn new things and always keep questioning along the lines of why, where, and how. Starting from the size of the satellite, he explained the whole mechanism in detail. He talked about various aspects of science and technology in such a lucid way that even class 5 students understood the concept clearly. On the whole, the session was very informative and inspiring for all the students as well as teachers.

– Samyak Jain, Class 11

TÊTE-À-TÊTE WITH MR. PRADEEP GUJARATI

Q1. How did you get associated with Anubhuti and Dadaji?

I joined the Jain Group in November, 1992 at the Plastic Park in the customer accounts department. After spending 6 years there, I was transferred to the Food Park in 1998 in the raw material purchase department. I always received valuable guidance and support from Sri Ashok Bhau as well as Raja Bhai Mayur. I was transferred to Anubhuti School on the 13th of August, 2007. Here I started working in close contact with Dadaji, who was always available to give me his valuable guidance whenever I needed.

Q2. What has been your learning experience at Anubhuti?

I joined the school in August, 2007, and started handling the school accounts while maintaining regular consultations with Dadaji. I have been lucky to receive support and guidance not only from the Director but also from the successive principals over the years. That has contributed to my professional growth.

Q3. Any challenges that you have faced while working here?

I am from an industrial background. The administrative and official nature of my job here initially posed some challenges. Besides, I had to handle additional responsibilities during the occasional absence of senior members of the School Administration. I accomplished my work under the able guidance of Mrs. Nisha Jain and Sri Bhagwan Bhangale of Jain Hills who is a senior member of the office there. This gave me the opportunity to improve and enhance my administrative skills. Frankly, nothing is more fulfilling than this.

Q4. What inspires you to keep working hard day after day?

The very presence of the school staff members around the admin area keep me cheerful throughout the day, and that helps me to willingly take up more and more challenging jobs and work efficiently. I always make it a point to follow the motto: Working hard makes the life more meaningful. My faith in this motto keeps me working hard day after day.

YOUR EXAM TOOLKIT

Before going to take any examination, one must be fully equipped with everything one may need in order to pass the exam with flying colors. As the exam season is going on, you must carry the following things along with your stationery and pre-gathered knowledge.

1) Confidence: When you are about to start answering the questions, this tool will be of utmost importance. You must have faith in what you have studied. Remember that the less confident you are, the more are the chances of making a mistake.

2) Peace of Mind: The next important thing would be to make your rushing mind calm down. Meditate for a while before you start the paper and convince yourself that you know what you have studied and assure yourself that you will be able to answer all the questions.

3) Self-Talk: It is amazing how much talking to yourself can help you while writing your paper. A simple change in your thoughts can change the way you perceive an examination. If you visualize yourself doing well in the examination, the chances are that you actually will. Make sure that your feelings don't go to the negative side because that will just make things worse.

4) Budget your time: Realizing that time is almost up and many questions are still left will not help you at all to stay focused on the question in hand. Make sure that you divide your time beforehand and leave some for rechecking your answers. In fact, you should keep more time for this especially in mathematics exam. In case you are still short of time, don't panic. Solve the question in hand first and do it calmly. Otherwise, in that moment of fear, you will mess up the remaining questions too.

Armed with these tools, you are now fully prepped to face all your examinations. One thing you must be clear about is that it is only one of the many exams you are going to take in your life. It is not important to get full marks, but it is important to get marks that you have the potential and preparation for.

We would like to wish you all well for your exams.

"Don't stress out. Do your best. Forget the rest"
